ABOUT

Front-end developer with a passion for building interactive, user-friendly applications. Focused, willing to learn and adapt to create quality work. Enjoy challenging tasks and inventing creative solutions. Happy to collaborate, teach and learn from others. Motivated to see what is next.

EDUCATION

High School Diploma, Bur Oak SS

JUNE 2021

Took computer science in grades 10, 11, and 12.

Currently completed first year university.

Began learning web development in 2020

PROJECTS

Personal Gaming Website — *Monopoly*

https://sheepstar02.github.io/

This was nearly an 8 month project, starting from the beginnings of learning frontend development to recreate the class game of monopoly along with the potential for more games to be added. Utilizes the basic frontend languages but also backend technologies such as Websockets and Firebase. More information about this project is in my portfolio.

Other Projects — *My Portfolio*

https://sheepstar02.github.io/portfolio

For other projects, feel free to check out my portfolio. They are highlighted there and explained in more detail. This portfolio is my first React project. It utilizes the basic React features and concepts for a simplistic but effective design. The skills section displays quite a unique animation where a collection of "skill bubbles" can be hovered for a summarized description.
